Node.js

MongoDB

MySQL / PostgreSQL

## PROJECTS

### Todo-web-app

Aug 2023 - Aug 2023

<https://todo-app-reactjs-vanshchavda.netlify.app/>

Creating a responsive todo app with basic functionality. Users can add or delete tasks. Utilizing various delete icons for an enhanced user experience.

### Shooping-cart(Shopping.co)

Aug 2023 - Present

<https://shooping-cart-feature.netlify.app/>

A shopping cart functionality website using React.js and pure CSS, allowing users to add and remove products from the cart. The payable amount will be calculated, and I'm also implementing a search functionality for users to easily find products.

### **Nike - website**

Aug 2023 - Present

<https://nike-website-react.netlify.app/>

A static Nike website using high-quality React components that faithfully replicate Figma designs. Ensuring responsiveness across all devices and incorporating typographic headings for optimal visual appeal.

### **Robofriends**

Aug 2023 - Present

<https://robo-friends-reactjs.netlify.app/>

Robofriends project using React.js, incorporating the Tachyons CSS framework for styling. Fetching data from a random JSON format and implementing a search feature to easily find specific robots.

### **Weather-website**

Aug 2023 - Present

<https://weather-website-angular.netlify.app/>

Creating a weather website with Angular 16, allowing users to input city names as parameters. This enables the display of weather information for both the specified city and the main country weather. Help of rapid api weather data .

### **Team Page**

Sep 2023 - Present

<https://teampage-sciastra-official.netlify.app/>

A sciAstra team page designed in react js and react bootstrap with a clg, mentors, and founders section.

### **World News**

Aug 2023 - Present

<https://github.com/itsvanshchavda/news-website-angular>

A world news website with a variety of news channels as well as live news updates via news API and material UI.

### **Angular + Firebase To-do App**

Sep 2023 - Present

<https://angular-todo-firebase.netlify.app/>

Firebase + Angular To-do App for adding tasks and deleting tasks, as well as a live database that displays the task and remove data.
